#d
num1[c(1,2), c(3,4)]
num1[c(3),c(2,3)]
#f
num1[,4]
#g
```

R. Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

summary(cars)

```
##
       speed
                       dist
  Min.
         : 4.0
                  Min. : 2.00
##
   1st Qu.:12.0
                  1st Qu.: 26.00
##
  Median:15.0
                  Median : 36.00
  Mean
          :15.4
                  Mean
                         : 42.98
                  3rd Qu.: 56.00
   3rd Qu.:19.0
##
## Max.
          :25.0
                  Max.
                         :120.00
```

Including Plots

You can also embed plots, for example:

Note that the \mbox{echo} = FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.
